Michael Weindenhaft
 Mitchell RWD 3
 2034 240th Rd.
 Beloit, KS 67420

Dear Michael;

Thanks for taking the time to visit with me concerning the OIT program today. I was glad to hear that the chlorine residuals are holding between the 4.0 mg/l and 1.0 mg/l combined chlorine throughout the system. I know you still have some concern when the weather warms up but that is the nature of the situation; the city will probably be re-chlorinating at the well houses before you know it.

As we discussed you will need to test for a Class I certification, as your system serves >501. The requirements are listed below. Also, remember you need to have your application to KDHE by March 18 to test at the conference. I'm sure you will do fine; I look forward to seeing you at the conference.

System Classification for Operator Certification

Class	Description	Population Served
Small System	1. Distribution System Only 2. Chlorination of Groundwater only	All <501
I	1. Chlorination of Groundwater only 2. Treatment of Groundwater*	501-1,500 <501
II	1. Chlorination of Groundwater only 2. Treatment of Groundwater* 3. Treatment of Surface Water	1,501-5,000 501-2,500 <2,501
III	1. Chlorination of Groundwater only 2. Treatment of Groundwater or Surface Water*	5,001-20,000 2,501-10,000
IV	1. Chlorination of Groundwater only 2. Treatment of Groundwater or Surface Water*	>20,000 >10,000

Please contact KRWA or me directly at 785-541-0342 if we can be of further assistance. I enjoyed the opportunity to work with you on this and look forward to working with you in the future. Also, visit the KRWA website www.krwa.net for news and information concerning water and wastewater utilities, training opportunities and other KRWA programs.

Again, thank you for the opportunity to meet and to be of help.

Sincerely,

Greg Metz
 Technical Assistant
