

# Full House at McPherson Opera House for KRWA Training Session

It was a full house in the McPherson, Kan. Opera House and at the noon lunch at HD Supply Waterworks in McPherson on Friday, October 9. A total of 88 people attended the training session that also provided the benefit of a noon lunch and short time for attendees to visit with manufacturers' reps at HD Supply Waterworks. Following lunch, the training returned to the Opera House. Combined with the time to discuss products, it's KRWA's opinion that operators benefit as much from this type of training as any other.

Topics at the session included: Line Locating Technology by Jim Grimes, Rycom Instruments, Inc.; Water Metering Technologies by Preston Hodges, HD Supply Waterworks and Smoke Testing and Reduction of Inflow and Infiltration (I & I) by Charlie Schwindamann, KRWA Wastewater Tech.

Systems attending included: Barton RWD 2, Brickley Enterprises, Buffalo Hills Park, city of Buhler, city of Burrton, city of Claflin, city of Delphos, city of Ellsworth, city of Enterprise, city of Florence, city of Goessel, city of Haysville, city of Hutchinson, city of Inman, city of Liberal, city of Lindsborg, city of Little River, city of Macksville, city of Mount Hope, city of Nashville, city of Newton, city of Salina, city of Sedgwick, city of Solomon, city of South Hutchinson, city of Sylvan Grove, city of Sylvania, city of Towanda, city of Valley Center, city of Walton, city of Wichita, Coffey RWD 3, Ellsworth RWD 1, H.E.I., Harvey RWD 1, HD Supply Waterworks, Marion RWD 1, McPherson RWD 4, Morris RWD 1, Reno RWD 4, Saline RWD 1, Falun and Veolia Water.

It's a full house! The cameraman had his back to the wall ...and the lens was filled with the 88 people who attended the training session in McPherson on Friday, October 9. The training was held at the Opera House in downtown McPherson.

Jim Grimes, Rycom Instruments, instructed at the morning session on line locating technologies.

Preston Hodges, HD Supply Waterworks, discussed water metering technologies.

A noon lunch was provided complimentary of HD Supply Waterworks, McPherson. The lunch was held at HD Supply Waterworks where those attending could also visit with manufacturer representatives before returning for the remainder of the training at the Opera House.

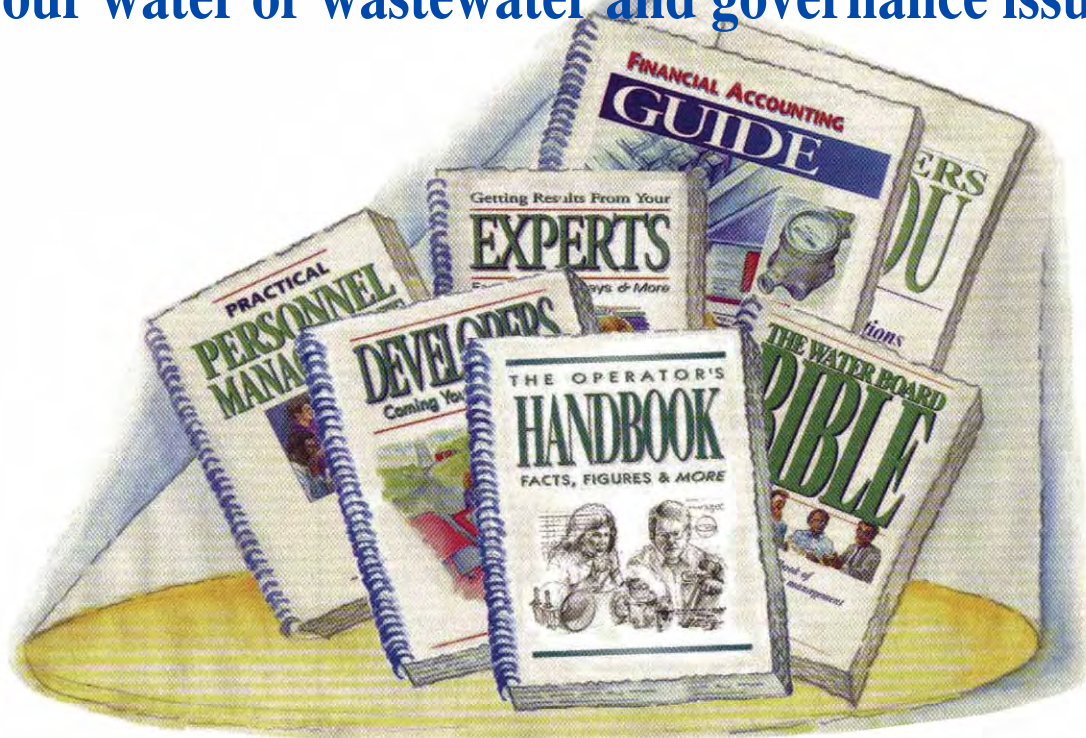

The McPherson Opera House was saved from destruction in 1986 by the McPherson Opera House Preservation Company (now the McPherson Opera House Company). The property is listed on the National Register of Historic Places.

The *Water Board Bible* Series –  
more than 42,000 copies sold nationally!

## Check out the “Water Board Bible” series to help you with your water or wastewater and governance issues.

The *Water Board Bible* Series is the only set of handbooks written specifically for water and wastewater operators, managers, superintendents, boards and councils/mayors. They include case histories, samples, practical tips and ready-to-use forms. Busy operators need down-home help that works!

For example *The Operator's Handbook: Facts, Figures & More* has the definitions, formulas, examples and basic math to handle daily problems. This 7th KRWA handbook covers:

- Safety
- Pipes and piping
- Fittings
- Valves
- Flow
- Disinfection .. and much more

Hundreds of cities and rural water districts and more than 35 state and national associations have purchased the Water Board Bible series. Check these publications that can help your system:

- Worried about unproductive monthly meetings or micromanagement? See the original *Water Board Bible*. vol. 1
- Need protection against lawsuits and grievances? Check out *Practical Personnel Management for Small Systems*, vol. 2

- Unsure how to prepare and use financial reports or audits? Get the *Financial Accounting Guide for Small Water Utilities*, vol. 3
- Frustrated by customer communications? Use *Practical Communications for Small Systems*, vol. 4
- Having trouble getting construction projects to come in on time, within budget, meeting specs? You need *Getting Results from Your Experts: Engineers, Attorneys and More!*, vol. 5
- Unsure what tools you need to handle development? Get *Developers: Coming Your Way Fast!*, vol. 6
- Spending too much time finding formulas and facts? Order *The Operator's Handbook: facts, Figures & More*, vol. 7

**Special alert to boards/councils, managers and superintendents:** Capacity development by systems of all sizes is a requirement of the 1996 Safe Drinking Water Amendments. These handbooks help you rate your system's technical, managerial and financial capacity.
